N.J.S.A. 34:11-56.48 et seq. requires that a general or prime contractor and any listed subcontractors named in the contractor's bid proposal shall possess a certificate at the time the bid proposal is submitted. After bid proposals are received and prior to award of contract, the successful contractor shall submit a copy of the contractor's certification along with those of all listed subcontractors. It is the general contractor's responsibility that all non-listed sub-contractors at any tier have their certificate prior to starting work on the job.

Under the law a "contractor" is "a person, partnership, association, joint stock company, trust, corporation or other legal business entity or successor thereof who enters into a contract" which is subject to the provisions of the New Jersey Prevailing Wage Act (N.J.S.A. 34: 11-56.25, et seq.) It applies to contractors based in New Jersey or in another state.

The law defines "public works projects" as contracts for "public work" as defined in the Prevailing Wage statute (N.J.S.A. 34:11-56.25(5)). The term means:

- “Construction, reconstruction, demolition, alteration, or repair work, or maintenance work, including painting and decorating, done under contract and paid for in whole or in part out of the funds of a public body, except work performed under a rehabilitation program.
- “Public work” shall also mean construction, reconstruction, demolition, alteration, or repair work, done on any property or premises, whether or not the work is paid for from public funds...”
- “Maintenance work” means the repair of existing facilities when the size, type or extent of such facilities is not thereby changed or increased. While “maintenance” includes painting and decorating and is covered under the law, it does not include work such as routine landscape maintenance or janitorial services.

To register, a contractor must provide the State Department of Labor and Workforce Development with a full and accurately completed application form. The form is available online at [https://www.nj.gov/labor/wagehour/regperm/pw\\_cont\\_reg.html](https://www.nj.gov/labor/wagehour/regperm/pw_cont_reg.html).

N.J.S.A. 34:11-56.55 specifically prohibits accepting applications for registration as a substitute for a certificate or registration.

*Effective May 1, 2019* a [Supplement](#) to the PWCR application must be completed for all new and renewal applications. The Supplement pertains specifically to participation in a registered apprenticeship program and possession of all licenses, registrations or certificates required by State law.

**20. PROMPT PAYMENT – GOODS & SERVICES – P.L. 2019, C.127 (LFN 2019-02 1/23/19)**

P.L. 2018, c. 127 establishes a prompt payment requirement that applies to goods and services contracts a contracting unit awards to a “business concern” under the Local Public Contracts Law (LPCL). The law applies to all goods and services contracts awarded on or after February 1, 2019 (the law’s effective date) regardless of dollar amount and any contracts requiring either a single payment or multiple payments. The law does not change the prompt payment requirements for improvements to real property and structures as set forth in N.J.S.A. 2A:30A-1 et seq. and described in LFN 2006-21. The law defines “Business Concern” as any person engaged in a trade or business, including a private nonprofit entity operating as an independent contractor, providing goods and services directly to a contracting unit or to a designated third party and operating pursuant to a contract with a contracting unit which requires either a single payment or multiple payments, but shall not include a “public utility” as defined in N.J.S.A. 48:2.13.

**21. TERMINATION OF CONTRACT**

- A. If, through any cause, the contractor shall fail to fulfill in a timely manner obligations under the contract or if the contractor shall violate any of the requirements of the contract, the Somerset County Park Commission shall there upon have the right to terminate the contract by giving written notice to the contractor of such termination and specifying the effective date of termination. Such termination shall relieve the Somerset County Park Commission of any obligation for balances to the contractor of any sum or sums set forth in the contract. Somerset County Park Commission will pay for goods and services accepted prior to termination.
- B. Notwithstanding the above, the contractor shall not be relieved of liability to the Somerset County Park Commission for damages sustained by the Somerset County Park Commission by virtue of any breach of the contract by the contractor and the Somerset County Park Commission may withhold any payments to the contractor for the purpose of compensation until such time as the exact amount of the damage due the Somerset County Park Commission from the contractor is determined.
- C. The contractor agrees to indemnify and hold the Somerset County Park Commission harmless from any liability to subcontractors/suppliers concerning payment for work performed or goods supplied arising out of the lawful termination of the contract by the Somerset County Park Commission under this provision.
- D. In case of default by the contractor, the Somerset County Park Commission may procure the goods and services from other sources and hold the contractor responsible for any excess cost.
- E. Continuation of the terms of the contract beyond the fiscal year is contingent on availability of funds in the following year’s budget. In the event of unavailability of such funds, the Somerset County Park Commission reserves the right to cancel the contract.

- F. It is understood by all parties that if, during the life of the contract, the contractor disposes of his/her business concern by acquisition, novation, merger, sale and/or transfer or by any means convey his/her interest(s) to another party, all obligations are transferred to the new party. In this event, the new owner(s) will be required to submit all documentation/legal instruments that were required in the original bid/contract. Any changes shall be approved by the Somerset County Park Commission.
- G. The contractor will not assign any interest in the contract and shall not transfer any interest in the same without the prior written consent of the Somerset County Park Commission.
- H. The Somerset County Park Commission may terminate the contract for convenience by providing sixty (60) calendar days advanced notice to the contractor.
- I. The contractor shall maintain all documentation related to products, transactions or services under this contract for a period of five years from the date of final payment. Such records shall be available to the New Jersey Office of the State Comptroller upon request.
- J. For contracts that exceed one year, each fiscal year payment obligation of the Somerset County Park Commission is conditioned upon the availability of Somerset County Park Commission funds appropriated or allocated for the payment of such an obligation. If funds are not allocated and available for the continuance of any services performed by the bidder awarded the contract (contractor) hereunder, whether in whole or in part, the Somerset County Park Commission at the end of any particular fiscal year may terminate such services. The Somerset County Park Commission will notify the contractor in writing immediately of any services that will be affected by a shortage of appropriated funds. This provision shall not be construed so as to permit the Somerset County Park Commission to terminate the contract during the term, or any service hereunder, merely in order to acquire identical services from another contractor.
- K. Neither party shall be responsible for any resulting loss or obligation to fulfill duties as specified in any of the terms or provisions of a contract if the fulfillment of any term or provision of the contract is delayed or prevented by any revolutions, insurrections, riots, wars, acts of enemies, national emergencies, strikes, floods, fires, acts of God, or by any cause not within the control of the party whose performance is interfered with which by the exercise of reasonable diligence such party is unable to prevent. **22. ACQUISITION, MERGE, SALE AND/OR TRANSFER OF BUSINESS, ETC.**

It is understood by all parties that if, during the life of the contract, the contractor disposes of his/her business concern by acquisition, merger, sale and/or transfer or by any means convey his/her interest(s) to another party, all obligations are transferred to that new party. In this event, the new owners(s) will be required to submit, when required, a performance bond in the amount of the open balance of the contract.

**23. ADDITIONS/DELETIONS OF SERVICE**

The Somerset County Park Commission reserves the right to add and/or delete services to this contract. Should a service requirement be deleted, payment to the Contractor will be reduced proportionally to the amount of service deleted in accordance with the bid price. Should additional services be required, payment to the Contractor will be increased proportionally to the amount of service added in accordance with the bid price.

Any prospective bidder who wishes to challenge a bid specification shall file such challenges in writing with the contracting agent no less than three (3) business days prior to the opening of the bids. Challenges filed after that time shall be considered void and having no impact on the contracting unit or the award of contract.

**27. OWNERSHIP OF MATERIAL**

The owner shall retain all of its rights and interest in any and all documents and property both hard copy and digital furnished by the owner to the contractor for the purpose of assisting the contractor in the performance of this contract. All such items shall be returned immediately to the owner at the expiration or termination of the contract or completion of any related services, pursuant thereto, whichever comes first. None of the documents and/or property shall, without the written consent of the owner, be disclosed to others or used by the contractor or permitted by the contractor to be used by their parties at any time except in the performance of the resulting contract.

Operational and Maintenance Instructions  
Vacuum Cartridge Filter System  
Model: CP-IWF-CB

Spring Startup:

1. Open the collector tank and inspect for and remove any debris that may have accumulated.
2. Open the red handled ball valve on the 1" fresh water fill.
3. If water does not begin to flow into the tank, check the water meter or any upstream valves to be sure they are open. Also check to be sure the Toro valve is open by turning the handle counter-clockwise two full turns.
4. Install the clean vacuum cartridge filter elements onto the black element supports inside the tank. Turn them clockwise no more than 3 turns. Do not tighten.

5. Remove the 1/4" plastic pump plugs from the hair lint strainer basket and apply a liberal amount of water based lubricant to the rings before threading them back into the bottom sides of the pump trap. Complete this on both pumps. Hand tight only.
6. After the collector tank has filled to the float device on the water fill system in the tank, fill each pump trap with water.
7. Apply water based lubricant to the rings on each pump trap lid before installing lids on each pump.
8. If Winterizing plugs have been installed on splash pad feature lines, remove these according to the feature manufacturer's instructions and install feature nozzles.
9. Open the "K" Filter Suction valve on the trap side of the recirculation pump, close the "J" Tank Drain valve, close the "G" pump to waste line which should open the "E" return line.
10. Install the chemical controller probes and connect to the proper electrical twist lock connections for ORP and pH. Open the 1/2" ball valves on each side of the chemical controller flow cell. For the Pentair AK110 model, open both valves simultaneously until the chemical controllers "flow" green light comes on. Opening the valves all the way may cause a flow alarm.
11. Turn on the breaker for the recirculation pump and confirm that the pump primes. Confirm the flow rate is at the system designed GPM on the "E" return line flow meter.
12. Confirm that the vacuum gauge on the recirc. pump suction is reading at clean filter pressure. If not, follow the instructions above for back washing the filter.
13. Turn on the Control panel and wait for the digital screen to complete the reboot sequence. If screen does not reboot contact the panel manufacturer for instructions. Check that panel breaker is on in external breaker panel.
14. Confirm that all feature valves are set to normal operating positions on the feature manifold.
15. Turn on the breaker for the Feature pump and/or the Feature pump motor starter.
16. Walk to the activator on the splash pad and apply pressure. Water should begin to flow from the feature lines on the pad. Wait approximately 30 seconds for water to begin to flow. Be sure pump is primed. Confirm clean filter vacuum on the vacuum gauges.
17. Confirm that feature flow operation starts and stops according to the design timing sequence and that the activator restarts the sequence. Repeat this several times to verify proper operation.
18. Clean and refill chemical tanks with fresh chemicals.

### **2.3 CLOSING AND WINTERIZATION OF THE SPRAY PARK**

#### **Spray Park Winterization: To be completed by October 8, 2021**

1. Back wash filtration system.
2. Blow out all feature supply lines.
3. Empty main and return lines.
4. Fill all appropriate lines with anti-freeze and secure for winter.
5. Empty tanks.
6. Shut down and secure all mechanical systems.
7. Follow directions to winterize the Vak Pak Remote Collector Tank, Equipment Cabinet, and Remote Drain Box as outlined in Attachment B.
8. Follow directions to winterize the Vacuum Vartridge Filter System as outlined in Attachment C.
9. Follow directions to winterize the Water Odyssey Spray Park Features as outlined in Attachment D.

### **ATTACHMENT B**

#### **Vak Pak Remote Collector Tank:**

1. Open the collector tank lid.
2. Close the 1" isolation ball valve located near the opening of the tank.

3. Go to the Vak Pak equipment cabinet and turn off the recirculation pump breaker. Open valve "J" Tank Drain on the suction side of the recirculation pump.
4. Rotate the multiport valve on the sand filter to "WASTE".
5. Turn on the recirculation pump and be sure it primes. You should see the water level in the collector tank begin to drop.
6. When the water has been evacuated from the tank or when the recirculation pump loses prime turn off the recirculation pump and rotate the sand filter multiport valve to "WINTERIZE".
7. Remove the Little Giant sump pump from the equipment cabinet, attach the 10' garden hose and lower it into the 12"x12" sump box in the bottom corner of the tank. Insert the free end of the garden hose into the 2" tank drain line. Be sure there are no kinks or severe bends in the hose so water will flow freely from the pump to the overflow line.
8. Plug the sump pump into the GFCI protected receptacle. If there is more than 4" of water in the sump box the pump should discharge it to the overflow line.
9. Remove the element manifold assembly by removing the stainless lag screws between the check valve and the element tee.
10. Using a short wooden pole (approx. 3' long) push inside the check valve with the pole to release any water in the pipe. Be prepared to get a little wet! After the pipe is evacuated of water do the same thing with the recirculation suction line check.

This should complete the collector tank winterizing process. Simply unplug the sump pump, remove it from the collection tank with the hose. Place the sump pump neatly back inside the Vak Pak equipment cabinet. Open the 1" fresh water fill isolation valve and water should begin to refill the tank.

#### **Vak Pak Equipment Cabinet:**

1. Be sure the recirculation and feature pump breakers have been tripped off before the following steps are completed.
2. Remove the lids from the recirculation pump and feature pump hair and lint traps. Remove any debris that has accumulated inside the basket (fig.1). There is an O-ring located around the inside of the HL Trap lid. This should be placed in the basket of the trap for safe storage and to keep it from getting lost.
3. On the bottom side or front of each pump you will find a ¼" plug. Turn this counter clockwise to remove and place these in the associated pump baskets with the O-ring. Some water may drain from the unplugged openings when the plugs are removed. This is fine, let it drain.
4. On the bottom side of the sand filter is a 1-1/2" drain cap. Remove and store in the recirculation pump HL trap basket with the other items for safe keeping. Water should begin to drain into the sump box and out through the floor drain. If water begins to back up inside the sump box, remove the grated cover and unblock the drain.
5. Open the air relief valve located on top of the feature pump and recirculation pump discharge lines. This will allow air to enter the piping as water exits. Leaving this valve closed will create a vacuum and water will not be able to drain properly.
6. A brass hose Bibb is located on the bottom side of the fracture valve manifold. Open this valve and allow water to drain.
7. Open the manual throttling valves on every feature return line. Be sure that each valve is open fully.
8. Remove the ¼" drain plug located on the bottom of the "to heater" and "from heater" lines. These are located on the 2" pipe connection just outside the heater (fig. 10). Place these plugs in the HL trap basket for safe keeping.

This should complete the winterizing process for the Vak Pak equipment cabinet. Simply replace all of the stored plugs, caps, and lids and close the air relief valves before spring startup.

## **Vak Pak Remote Drain Box:**

You will discover a remove drain pit located outside the Vak Pak equipment cabinet. It should be located directly between the feature manifold (inside the cabinet) and the splash pad. It should be a long narrow valve box with a grated cover.

1. Open the cover or remove the grating.
2. There will be several PVC tees with 1" ball valves on each tee. Open these valves. You should see water draining from the valves and traveling to a floor drain in the bottom of the drain box. If the drain backs up, remove the small grated cover and unblock the drain. Replace the grated cover after blockage is removed.
3. Replace the cover or grating over the drain box.
4. It is recommended that each feature line at the splash pad have its nozzle removed and an air compressor be used to force any remaining water in the feature lines from the splash pad towards the drain box.
5. Consult the feature nozzle manufacturer as to whether the nozzles should remain in their sockets on the plush pad or if they should be removed and stored until spring. If they are to be removed it is recommended that a winterizing plug be placed in the nozzle socket to prevent debris from accumulating in the feature lines during the winter.

This should complete the winterizing process for their feature manifold drain box. Simply replace all feature nozzles and close all drain box valves before spring startup.

Operational and Maintenance Instructions  
Vacuum Cartridge Filter System  
Model: CP-IWF-CB

Winterizing or Off Season Shutdown Procedures:

1. Turn the recirculation pump off and open the "J" Tank Drain suction line on the recirculation pump and close the "K" Filter Suction valve. Open the "G" pump to waste line on top of the recirculation pump.
2. Attach a garden hose and pressure nozzle to the hose Bibb located inside the collector tank.
3. Turn on the recirculation pump making sure it primes. You will notice the collector tank water level recede as the water in the tank is pumped to waste.
4. Turn the black Toro hydraulic solenoid valve handle clockwise to close. This should stop the auto water fill from refilling the tank as it drains.
5. Using the hose and nozzle, spray down the walls of the tank as the water recedes to wash any clinging debris down to drain.
6. Remove the filter elements from the tank, clean, and store in a cool dry place for the off season. (Read the vacuum cartridge element maintenance sheet before proceeding)
7. Disconnect the hose and nozzle when finished and close the red handled fresh water fill hose Bibb in the tank to prevent water from refilling the tank. Open the Toro hydraulic solenoid valve by turning two full turns counter-clockwise to allow it to drain.
8. If the collector tank lid has ½" vent holes on each side, seal those with plugs or tape for the off season.
9. Close and lock the lid of the collector tank to prevent entrance.
10. Remove the hair and lint baskets from the recirculation and feature pumps as well as the ¼" drain plugs (2 plugs per pump) to allow water to drain. Place the plugs in the pump trap baskets for safe keeping and DO NOT replace the lids.

## Winterization Supplement

**Provisions for winterization are not provided by Fountain People, Inc.™ Supplemental aids should be considered at the time of installation.**

1. Remove surface level features if applicable, blow out or suck out supply lines to the features. (via the use of a wet/dry shop-vac) **IT IS ALWAYS BEST TO GRAVITY DRAIN TOWARD LOWER LEVELS.**

Plug water supply inlets. (inside cans) Drain lines, where applicable, may be left open to permit ice melt drainage back to the reservoir, or to waste. Determination of the drain capability should be made by local authority.

- The use of inflatable plugs is not recommended. Mechanical or threaded plugs work best.
- If RV type antifreeze is used, although **not recommended**, the system should be thoroughly flushed before re-use after de-winterization occurs. (even RV antifreeze is toxic)
- Original grade pour templates (shipped on the embed cans) may be retained for use as winterization plates, and store feature in secure location only if the play area is secured and inaccessible when not in use. Pour templates are not safety rated for foot traffic.
- As an option, Winterization plates made of stainless steel can be purchased to cover surface level feature cans.
- A 3" square piece of mattress foam, or block of Styrofoam should be placed in all surface level feature cans to absorb expansion should water get into the can during freezing temperatures to prevent the can from cracking the concrete

2. Remove plugs from blindsided above ground features to permit continual drainage, and store in a secure location. Features with items that can trap accumulation of water, ie; buckets, coconuts, sails, etc. should be removed, covered, or turned upside down and held secure by some acceptable means.

3. To drain the manifold if a means for drainage is not provided, energize the solenoid valves by using the Forced 1/0 signal as described in the DSC O&M Manual.

**(Where the system is potable rather than recirculated, some items will not apply)**

4. Power should be left ON to the main control panel to insure that the Lithium-Ion memory battery remains charged for short term outages but outputs to sequencing valves should be disabled. This is done by opening the power supplied to the outputs via resettable fuse, or fuse block (see electrical diagram) Reservoir drain should be left in the drain position.
5. Turn off, or unplug vent fans in vaults.
6. Pumps should be left open (strainer covers removed) with **all suction valves closed.**
7. Power to the reservoir should be left on to permit constant drainage by use of the reservoir drain pump or gravity drain through out the periods of inclement weather.

#### Supplemental Notes

A threaded pipe plug or mechanical plug may be used to prevent water from running back into the pipe after having been drained and cleared.

To prevent freeze expansion that could cause the can to swell and damage to concrete or the can to split, install a piece of mattress foam or Styrofoam. A 3" square is the right size for most cans.

## 5. REPAIRS

1. Respond to calls for non-emergency repairs, chlorine delivery, operational questions, and balancing chemical delivery from SCPC Recreation Maintenance Staff and/or Facility Managers as necessary within 24 hours.

In providing any aid, benefit, or service on behalf of the owner pursuant to this contract, the contractor agrees that the performance shall be in strict compliance with the Act. In the event that the contractor, its agents, servants, employees, or subcontractors violate or are alleged to have violated the Act during the performance of this contract, the contractor shall defend the owner in any action or administrative proceeding commenced pursuant to this Act. The contractor shall indemnify, protect, and save harmless the owner, its agents, servants, and employees from and against any and all suits, claims, losses, demands, or damages, of whatever kind or nature arising out of or claimed to arise out of the alleged violation. The owner shall, as soon as practicable after a claim has been made against it, give written notice thereof to the contractor along with full and complete particulars of the claim, If any action or administrative proceeding is brought against the owner or any of its agents, servants, and employees, the *owner shall* expeditiously forward or have forwarded to the contractor every demand, complaint, notice, summons, pleading, or other process received by the owner or its representatives.
