

BRANCHBURG'S FERRIERA CONSTRUCTION HAS FIRST NET ZERO ELECTRIC COMMERCIAL BUILDING IN REGION

The Ferreira Construction Company's home office at 31 Tannery Road, Branchburg, is a model for energy efficiency. It was New Jersey's first 'net zero' electric energy commercial facility. Utilizing incentives provided through the New Jersey Board of Public Utilities and New Jersey's Clean Energy Program, Ferreira Construction has been able to meet all of the electric energy needs of its 42,000 square foot building headquarters through a combination of solar photovoltaic and energy efficiency measures.
