

# Walk, Bike, Hike

## SOMERSET COUNTY

CONNECTING VIBRANT COMMUNITIES

### Introduction

Somerset County benefits from a rich, diverse and scenic natural heritage, and features an abundance of parks and open space and vast tracts of preserved lands with numerous trails and trail segments that traverse the county. The county is undertaking a planning effort intended to support the development of a network of bicycle and pedestrian facilities, trails, and greenways across Somerset County - providing an alternate means to travel between places throughout the county.

The *Somerset County Walk, Bike, Hike Plan* will help create an integrated network of multi-use trails and paths that serve a variety of transportation needs and connect users of all ages and abilities to the many opportunities, services, and destinations in the region.

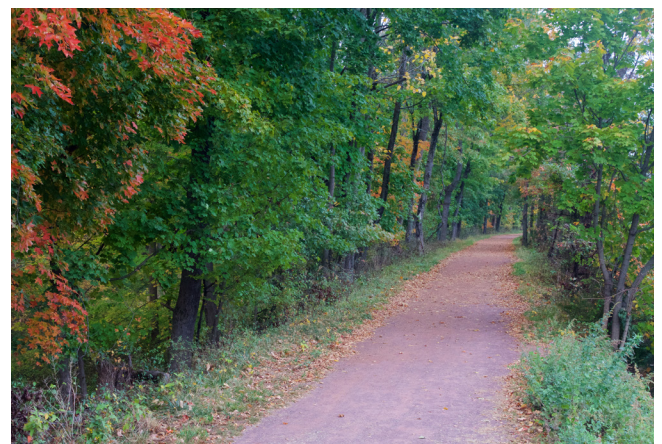

### Work with us to identify opportunities to:

- Fill in gaps in existing trails
- Create new linkages between trails and trail systems
- Provide new and enhanced trail crossings at busy roadways
- Create new bike facilities
- Improve pedestrian safety and mobility
- Develop beneficial and desired trail amenities

### We need your ideas and feedback to:

- Identify gaps in existing trails and bike lanes
- Create new links between bike facilities, trails and trail systems
- Improve bike and pedestrian crossings at busy roads

### Help us make this regional planning effort a success!

For more information or to send us your ideas please email us at [walkbikehike@co.somerset.nj.us](mailto:walkbikehike@co.somerset.nj.us)
