# WOMEN'S LAND ARMY

The Women's Land Army was a coalition of women, devoted to agriculture in the wake of WWI and WWII. They utilized their skills and work ethic to tend to the farms, ensuring the prevention of further food scarcity. Even while faced with extreme backlash- not only did these amazing women feed those back home, but their efforts fed troops abroad from 1942-1945.

*SAY WHAT? Food Fights for Freedom!*  
These great ladies paved the way for future generations, regardless of gender, to have the courage to work in any chosen field!
