

SPEAK Outreach & Prevention

WEBINAR SERIES

Understanding The Hidden Crime of Stalking

Wed, Jan 18 @ 11AM-12PM

Impacting 1 in 3 women and 1 in 6 men, acts of stalking are targeted, purposeful, isolation, and can have terrifying impact on the lives of survivors. Stalking is also an important predictive factor for future violence perpetration, up to and including homicide. In recognition of Stalking Awareness Month, Safe+Sound Somerset's webinar will:

- Define and discuss stalking, its prevalence, and the impacts it has on stalking victims
- Outline the overlap between stalking and domestic and sexual violence
- Discuss ways to recognize stalking, support victims, and hold stalkers accountable

Why Don't Adults Take Our Relationships Seriously?

Understanding Teen Dating Violence and Sexual Assault

Wed, Feb 8 @ 3-4:30PM

During Teen Dating Violence Awareness Month, join us for our most popular webinar - developed based on feedback provided by the 16,000 teen participants in our innovative education and prevention programs. For adults who work with or care about young people, this interactive webinar provides an in-depth look at teen dating violence and sexual assault, including a review of the latest research on teen financial abuse. Based on a framework of healthy relationships, adults will leave with a better understanding of the issues to be able to compassionately help teens impacted by violence and connect them to services.
