

## About Healthy Women Healthy Families

The Healthy Women Healthy Families (HWHF) Program is for childbearing pregnant and non-pregnant women and their families from all races and backgrounds to improve their quality of life. Participants of the program will receive personalized support from a Community Health Worker and /or group support from programs specific to reducing infant death in cities with high rates of black infant mortality.

Central  
Intake

Community  
Health  
Worker

### Central Intake:
