

MAZES, OH MY!

MAZES, OH MY!

Corn Mazes are now a fun fall tradition, but have you ever wondered where the idea came from? Mazes have been a popular form of artwork for centuries. They can be found on the sides of buildings, within paintings, even on roads and floors. Formal gardens became popular in Europe – where the wealthiest castles and palaces had mazes to entertain royalty. These mazes, commonly made out of hedges, were in geometric patterns. The first corn maze was attributed to Annville, Pennsylvania.
