Risk of Consuming Edibles

The amount of THC is difficult to measure and is often unknown in many edibles.

Delayed onset and High Potential for Overdose - It can take 30 minutes to 2 hours to experience the effects from edibles.

Some adverse effects include:

Confusion

Anxiety & panic attacks

Agitation

Hallucinations

Impaired motor ability

Respiratory depression

Understanding Addiction

Drugged Driving

- Intoxicated drivers buzzed on booze and drugs are now the **leading cause of fatal traffic crashes** in New Jersey
- In 2021, 697 people were killed in 667 crashes, the highest fatalities since 2007
- Intoxication (both alcohol and drugs) was the top “contributing factor” in **210 fatal crashes in 2021, a 30% increase**
- For the first time, the **analysis separated the number of crashes where drivers, pedestrians or cyclists tested positive for cannabis**. It showed 91 drivers, 13 passengers, 23 pedestrians and two cyclists tested positive for cannabis after fatal crashes.

2021 NJ State Police Report
